

Invoice processing increased by 60%

Case Study: Hembrug

WISHES

Interface with Isah, more efficient invoicing and timesaving.

ADVANTAGES

- Invoice processing is fast and efficient
- No more loss of invoices
- Booking of purchase order invoices has greatly improved
- Processing cost invoices with templates
- Invoices can be made visible in Isah and Accountview

FACTS & FIGURES

- Isah and Accountview
- 8,000 invoices per year
- 15 users

CHOSEN SOLUTION

- Easy Invoice
- OCR software
- Easy Distribution

Hembrug designs and builds the Mikroturn series of unique, high quality and ultra precision fully hydrostatic machine tools. These machines give you full control over the hard turning process. Hembrug is mainly active on the foreign market with a focus on Europe, but also in the USA, Canada, and the Far East.

THE SWITCH TO ELECTRONIC PROCESSING

Hembrug wanted to switch to an efficient way of processing invoices. No more invoices getting lost, a 50% decrease of processing time per invoice, and an invoice recognition score of over 85%, with invoices sent in duplicate being recognised immediately.

THE CHOICE FOR EASY SYSTEMS

To make the invoicing process more efficient, Hembrug chose to implement the workflow solution Easy Invoice. "After comparing various suppliers, we chose Easy Systems. It was of great importance to us that Easy Systems had

knowledge of our ERP package, Isah. In addition, the possibilities of the solution to handle invoice bookings, the pricing, and the promised support were decisive factors", says Paul Koot, Head of Administration. With the implementation of Easy Invoice, the invoicing process of Hembrug has become automated, auditable, and transparent.

EXPERIENCE THUS FAR

The targets Hembrug had set in advance have been amply achieved. After implementation of Easy Invoice, booking invoices is a fast and efficient process:

- The processing speed has increased by more than 60%. ➤

“It was of great importance to Hembrug that there was knowledge present of our ERP package, Isah.”

Paul Koot - Head of Administration

- 95% of the invoices are correctly 'read' by the OCR software.
- No more invoices are lost, and the physical distribution and storage of invoices is no longer of importance.
- There is a better overview per supplier with the associated invoices at hand.
- When assessing the invoices, there is specific attention to invoices with deviations.

In addition, the entire process has become transparent and auditable, which results in significantly less errors.

EASY INVOICE OFFERS AN INTERFACE WITH ISAH

What is special about this case is that Hembrug uses the ERP environment Isah. Isah is an ERP system that is used by various organisations, especially in the manufacturing industry. Easy Systems is product partner of Isah and is the only company offering a standard interface with Isah, which was an important prerequisite for Hembrug.

De garanties of Easy Systems

- ✓ An interface for every financial system
- ✓ Fixed price implementation
- ✓ Completion possible in just 5 days
- ✓ Permanent time and cost savings
